## Meet us in Dubai! greenteg premieres at Arab Health 2023

**From 30 January – 2 February, greenteg will be exhibiting in the long-running fair Arab Health held in Dubai World Trade Center at booth PJ15**

Held since 1975, Arab Health is the largest healthcare event in the Middle East; offering conferences for knowledge transfers and a large tradeshow with companies involved in various parts of the healthcare sector.

With this year's Arab Health theme *"innovation and sustainability in Healthcare"*, greenteg will present FEVERFLUX®, its easy-to-employ thermal body temperature monitoring device, powered by CALERA®. FEVERFLUX® offers a simple solution for accurate patient monitoring, either in a hospital or in an at-home setting.

We look forward to networking, strengthening our brand presence internationally, and continuing to be informed about new trends within the healthcare industry.

We look forward to welcoming you at our booth PJ15! Meet our team Holger Hendrichs (VP of Sales) and David Gerritzen (Business Development) at our booth!

### About greenteg AG

Founded in 2009 as an ETH University of Zurich spin off; greenteg develops, manufactures, and markets thermal sensors to industry, OEMs and research labs. Manufactured in Switzerland, their team of over 40 specialists and researchers continuously develop their sensor technology. In 2022, CES® (Consumer Technology Association) awarded greenteg three awards for Calera® and CORE, their body temperature monitor used within the Health & Wellness, Sport & Fitness Wearable industries.
